Vol. VIII.

COALVILLE, SUMMIT COUNTY, UTAH, OCTOBER 25, 1901.

No. 42.

## POWERFUL MEN OF THE EAST.

An Interesting Explanation of Their Unusual Strength.

The Secret of the Marvellous Vitality and Nervous Force Jealously Guarded.

Women of the Hardest Compound and Utmost Vigor, and the Most Perfectly Balanced and Most Vigorous.

The highest hopes of a nation or a world are placed in the hands of the few who are the most powerful men of the East.

Crucially commended to the Women of the East, from the fact that they are the most powerful men of the East.

It is now generally known and understood that Drunkenness is a disease and not weakness. A body filled with poison, and nerves completely shattered by periodical or constant use of intoxicating liquors, requires an antidote capable of neutralizing and eradicating this poison.

## LETTERS FROM CORRESPONDENTS.

### Around the County in Seven Days.

The Happenings of the Past Week Told in Detail by Efficient Correspondents.

MARION.

Marion, Utah, Oct. 23, 1901.

Editor Times:

E. Sorenson went to Park City on the 20th to meet his wife.

Our new school house is completed and school will be held in it after the 25th inst.

P. H. Peterson, wife and daughter Blinn went to Park City on the 21st on business.

The Twitche Bros. from Wyoming have been here the past week buying cattle. They drove quite a big herd out on the 20th.

Mrs. Marianne Sorenson returned home on the 20th, after spending two weeks visiting relatives and friends in Salt Lake, Ogden and Hooper.

J. K. Lemon, Jr., left here this week for Clinchville, Platte County, where he will teach school this winter. He was accompanied as far as Heber City by his father.

ROCKFORD.

Rockford, Utah, Oct. 23, 1901.

Editor Times:

Mrs. James Vernon is still on the sick list.

A gang of men are here repairing the telephone line.

Mrs. N. A. Smith and son have returned from visiting her daughters in Salt Lake City.

H. E. Sorenson has just returned from Salt Lake, where he went to be with his brother during his operation.

Elders Kenneth Brown of Hoytville and George Budd of Marion were the speakers at our worship meeting Sunday.

Alfred Sorenson was taken to the hospital at Salt Lake from Park City about ten days ago. On Saturday last he underwent an operation for appendicitis. At last reports he was getting along as well as could be expected.

UPTON.

Upton, Utah, Oct. 23, 1901.

Editor Times:

The Upton threshing machine will finish its work about Saturday.

Our public schools are doing well under the able management of Miss Emma Hobson and Miss Martha Evans.

It is pleasing to report the improvement in health of Mrs. William Staley of this place; she has been sick for a long time.

The Clark brothers of this place have purchased the Pine View ranch, formerly owned by Thomas Lively of Coalville for the consideration of \$1400.

George Randall and family left here last Thursday for their new home in Idaho. They intend to locate on Snake river and make that their future home.

Elders Marchant of Peoa and Pearson of Oakley visited Upton on Sunday last as home missionaries, and both addressed the saints in a very interesting manner.

GRASS CREEK.

Grass Creek, Oct. 24, 1901.

Editor Times:

William Frost and Will Wilde are on the sick list.

The Union Pacific pay car made a trip over the branch Monday.

Wednesday was pay day and about \$4,000 was distributed among the employees.

Section Foreman Padden had a large force of men at work this week to complete the side track.

W. G. Fisher and George Beard, accompanied by their wives, visited the Sabbath school last Sunday. The organization of the school was completed.

Mr. Galleher of the Utah Coal company, Park City, was the guest of Sept. Hansen Monday. He visited the mine and was greatly surprised at its facilities and workings.

The wagon road to the mine is in need of attention. The travel is steadily increasing, many teams from up and down the river coming for coal. The county commissioners should help repair this road.

Hereafter the coal train will attend exclusively to the coal trade. The railroad officials have promised the best of service to the company and this will enable those in charge to attend to the coal more satisfactorily this winter.

Order No. 10, from the assistant superintendent at Evanston, says that the second switch shall be used as a safety switch and shall always be set for the ground. This is for the safety of the main line and to insure complete safety to all. This completes the second safety on the branch.

The coal that was shipped from this mine during the week ending last Wednesday amounted to about 3,100,000 pounds against 1,500,000 pounds for the same week last year. The coal output will be steady this year. A clean vein of coal is at present encountered and is giving general satisfaction.

The rails and ties for the new side track arrived several days ago and the section men immediately started to put them in place. The track will be ready for use in the very near future and it will be a great improvement; it will cut out a great deal of the work heretofore done by the train crew.

The coal mine has conformed to the requirements of the State mining law in every particular. The new fan is in fine working order, supplying sufficient air for at least 150 men. There is also a heavy iron door at the mouth of the tunnel so as to control all drafts and incoming currents.

ENO.

Eno, Utah, Oct. 24, 1901.

Editor Times:

A new section bore has been put on the lower section and has moved his family here.

A masquerade ball was given in the Hopkin Hall last Friday night and a good time was had.

The Park City train crew has been over night now and as a consequence it gives the town a little lift.

The Union Pacific is doing in the old bridges at the mouth of the canyon, preparatory to replacing them with iron bridges.

James Rogers is working nights at the station in Sam Sommer's place, the latter working in Mr. Cassman's place for a short time who is suffering with a severe cold.

The graders while plowing at the mouth of the canyon last week plowed up two human skeletons which had been buried there in early days. Some of the old miners here remember when they were buried and the circumstances which brought about their death.

The station changed hands last week. Thomas Williams has succeeded Mr. Bailey as agent, who has served in that capacity for eight years. It is with regret that we are compelled to lose Mr. Bailey, as he has given general satisfaction ever since he has been here. However we wish Mr. Williams success in his labors.

Business is on the improve in Echo at present. All the hotels and houses are full, the store is doing a rushing business and the constable and justice of the peace are trying to do everybody. We are going to petition the proper authorities for incorporation. In a few days and will elect our city officers at the coming election. The stores are being "fixed up" already, and the only thing we lack is the legal authority to go ahead.

RENEFER.

Renefar, Utah, Oct. 24, 1901.

Editor Times:

George Trietram was a Salt Lake visitor this week.

Two cars of oats and one of potatoes were loaded here this week.

After Amos Sargent addressed the people here at the afternoon meeting on Sunday last.

William Edgeworth and C. B. Toome have secured employment with the U. P. bridge gang.

E. H. Rhead and Alex. Street held a meeting here last Saturday night in the interest of religious classes.

A great deal of lumber is being hauled into Renefar and quite a lot of building and improvement work is being done.

Married, tonight, October 23th, James H. Sawyer to Miss Susanah Stephens. A wedding dance is being given. The many friends here with them a happy and prosperous journey through life.

B. Y. A. JENSEN.

Mr. Hansen, of the U. P. gave a reception at the Renefar school last Friday night. He was well as to the school as representative.

The Academy may well be proud of its wide spread fame. It now has representatives from nine different states in the Union, as well as from three foreign countries and Hawaii. Can any other school boast of such recognition?

The library has just received seven volumes of the government report on the geological survey west of the one hundredth meridian. This report has long been out of print and is therefore a valuable addition to the scientific library.

Prof. Hinkley and his class in geology will spend tomorrow in the Provo canyon where they will be able to study directly from nature, which offers many advantages over studying from books.

Miss Annie Pike, a graduate of 1900, is now studying in the University of Michigan. She has been asked for two of her poems to be published in the "Michiganian" the College annual.

Telegraphy, one of the important branches of the commercial college, is taught in securing the services of Mrs. Simpson as instructor. She has been for the past twenty-five years an operator for the Deseret Union Telegraph company. Young people who are desirous with their present occupations would do well to investigate and see if they could not find the desired change in telegraphy.

Another new building is beginning to loom up on the north side of the Academy block. It is to be the source of heat for all three buildings and will be equipped with an 85-horse power boiler.

Consuelo Allen of the Summit State Penitentiary was with us last week and witnessed the exercises on Founders' Day. His visit was especially to confer with the authorities of the Academy and the students of his State to find out whether there could be an organization of the students from that State effected, by which the State and ward authorities could keep better in touch with the students and give them aid when needed. It was decided that the organization should be effected, and that, too, as soon as possible.

Founders' day, the 16th inst., was fittingly celebrated. The school marched headed by their own brass band, from

the Academy building to the depot, where they met their friends who came in on the train, thence to the site where the old Academy building stood, and then returned to the Academy building, where they assembled in college hall and an excellent program was rendered, after which a banquet was given.

The "White and Blue" is again out and is a credit to those chosen to guide its destiny this season, as well as to the students who publish it.

The athletic association is again organized and doing effective work. This was evidenced on Founders' day when the contest took place. There promises to be much interest taken in athletics this year and each class is determined to own the new trophy and have their names engraved thereon. This trophy is a silver water set and was presented to the association by some of the business houses of Provo.

G. C. LARSEN, JR.

To the Public.

Allow me to say a few words in praise of Chamberlain's Cough Remedy. I had a very severe cough and cold and feared I would get pneumonia, but after taking the second dose of this medicine I felt better, three bottles of it cured my cold and the pain in my chest disappeared entirely. I am most respectfully yours for health, Ralph H. Meyers, 64-Thirtieth Street, Wheeling, W. Va. For sale by John Hayden & Son, Druggists.

IN THE DISTRICT COURT OF THE UNITED STATES for the District of Utah.

In the matter of George E. Hodges, bankrupt.—No. 276 in Bankruptcy.—Petition for Discharge.

To the Honorable John A. Marshall, Judge of the District Court of the United States for the District of Utah: George E. Hodges, of Park City, in the county of Summit and State of Utah, in said district, respectfully represents that on the 20th day of June last, he was duly adjudged bankrupt under the acts of Congress relating to bankruptcy; that he has duly surrendered all his property and rights of property, and has fully complied with all the requirements of said acts and of the orders of the court touching his bankruptcy.

Wherefore he prays that he may be decreed by the court to have a full discharge from all debts provable against his estate under said bankruptcy acts, except such debts as are excepted by law from such discharge.

Dated this 14th day of October, A. D. 1901.

GEORGE E. HODGES, Bankrupt.

Order of Notice Thereon.

On this 22nd day of October, A. D. 1901, on reading the foregoing petition it is ordered by the court, that a hearing be had upon the same on the 6th day of November, A. D. 1901, before said court, at Salt Lake City, in said district, at ten o'clock in the forenoon; and that notice thereof be published in the Utah Coalville Times, a newspaper printed in said district, and that all known creditors and other persons in interest may appear at the said time and place and show cause, if any they have, why the prayer of the said petitioner should not be granted.

And it is further ordered by the court, that the clerk shall send by mail to all known creditors copies of said petition and this order, addressed to them at their places of residence as stated.

WITNESSE the Honorable John A. Marshall, Judge of the said District Court, and its seal thereat, at Salt Lake City, in said district, on the 22nd day of October, A. D. 1901.

(Seal of the Court.)

JEROME R. LYNCH, Clerk.

District Court.

The district court has been in session since Monday morning trying the case of Daniel L. Boyle vs. the Union Pacific railroad company. This is the case wherein the plaintiff sues for \$30,000 damages for injuries received while acting as conductor of the above road. The case went to the jury yesterday afternoon about 5 o'clock and they were out about noon and a half, when they returned a verdict in favor of the plaintiff receiving \$10,000. The case will be appealed.

All juries were returned until November 25th, and court was adjourned to that date.

Send us your orders for all kinds of Job Work.

## THE HOME GOLD CURE.

An Ingenious Treatment by which Drunkards are Being Cured Daily in Battle of Temptation.

No Notorious Cases. No Wrecking of the Nerves. A Pleasant and Positive Cure for the Liquor Habit.

It is now generally known and understood that Drunkenness is a disease and not weakness. A body filled with poison, and nerves completely shattered by periodical or constant use of intoxicating liquors, requires an antidote capable of neutralizing and eradicating this poison.
